

Expert Series – Too Good To Be True

When it comes to piracy devices, if it looks too good to be true, it probably is.

It's not possible to get thousands of channels, all the sports content in the world, all the VOD content in the world for fifteen dollars.

The mainstream streaming services are providing a hundred channels, maybe. If you're getting ten-thousand channels...that's weird.

No normal business can survive by offering that wealth and that breadth of content.

My main advice is, be realistic. If it looks too good to be true...

If it's too good to be true...

If it looks too good to be true...

It's too good to be true.
